

8/6/07

To My Friend Dr. Michael
Maske

I cannot say thanks enough for the "miracle" you performed on my left arm. My arm was severely broken & shattered on Nov. 31st in a fall. I was referred to you on the following Monday. When we first met you said you would try to repair it, but if that didn't work I would need an elbow replacement. That would definitely limit my use of the arm.

On the 10th of April my surgery was scheduled. You and your team did the surgery and when checking the movement of my arm immediately after the surgery it all came apart. Instead of going to the

replacement elbow my family
and I think any other
surgeon would have done,
you and the team dug in
and started all over! For
me and my family that
showed "determination &
dedication" to your
profession. And it worked!

In the days & weeks that
followed you showed humor,
kindness and great support!
Your therapists particularly
Whitney Cushman and staff
have given me more use
of my arm than I ever
expected!

For this I will ever be
grateful to all of you!

Maureen Kissler
